

Road Conditions

DECEMBER 2009

N1

National Route	N1
Section	Old Oak Interchange to Worcester
Distance	82.44 km
Description	Two-lane dual carriageway with paved shoulders.
Condition of Road	Fair to Good.
Comments	Construction works are in progress between Koelenhof Interchange and Huguenot Tunnel. Through the construction zones, traffic will be restricted to one lane under reduced speed. Construction works will be suspended during the December/January holiday period from 11 December 2009 until 11 January 2010.
Duration of Work	September 2008 to April 2010
Contact for Routine Maintenance	Heuppschenne Lekay 082 782 9155

National Route	N1
Section	Worcester to Laingsburg
Distance	156 km
Description	Single carriageway with paved shoulders. The road through Hex River Pass is a four-lane dual carriageway (four km) with an arrestor bed in the south-bound direction before the hairpin curve known as "Spookdraai". Stopping places are provided at regular intervals.
Condition of Road	Good.
Comments	A compulsory stop, manned by the Provincial Traffic Department, is in operation \pm five km south of Touws River. An unmanned compulsory stop for heavy vehicles is also in operation on the south-bound carriageway in Hex River Pass. Motorists should also be alert to pedestrians and/or stray animals just north of De Doorns. Motorists should also be alert to hawkers selling alongside the road. It is illegal to stop and buy from the sellers.
Duration of Work	
Contact for Routine Maintenance	Carl Roberts 082 468 0241

National Route	N1
Section	Laingsburg to Leeu-Gamka
Distance	124 km
Description	Single carriageway with paved shoulders. Stopping places are provided at regular intervals.
Condition of Road	Good.
Comments	Construction works are in progress approximately 70km north of Laingsburg. Motorists can encountered up to two manually and traffic-light controlled Stop/Go sections with waiting periods on average 15 minutes. Construction works will be suspended during the December/January holiday period from 11 December 2009 until 11 January 2010. "Kanniedood" safety project is in operation on this section of road. A compulsory stop, manned by the Provincial Traffic Department, is in operation ± 15 km south of Leeu-Gamka. Motorists should be alert to pedestrians and/or stray animals crossing the road in the vicinity of Leeu-Gamka.
Duration of Work	April 2009 to February 2011
Contact for Routine Maintenance	Aubrey Sardien 082 328 9422

National Route	N1
Section	Leeu-Gamka to Beaufort-West
Distance	75 km
Description	Single carriageway with paved shoulders. Stopping places are provided at regular intervals.
Condition of Road	Good.
Comments	Motorists should be alert to pedestrians and/or stray animals in Beaufort-West.
Duration of Work	Ongoing
Contact for Routine Road Maintenance	Aubrey Sardien 082 328 9422

National Route	N1
Section	Beaufort-West to Three-Sisters
Distance	97 km
Description	Single carriageway with paved shoulders. Stopping places are provided at regular intervals.
Condition of Road	Good.
Comments	Routine road maintenance teams may be encountered
Duration of Work	Ongoing
Contact for Routine Maintenance	Aubrey Sardien 082 328 9422

National Route	N1
Section	Three-Sisters to Colesberg
Distance	236 km
Description	Single carriageway with paved shoulders. Stopping places are provided at regular intervals.
Condition of Road	Fair to Good.
Comments	Construction works are in progress 30km north of Three Sisters. Motorists will encounter traffic control by means of Stop/Go measures during the day and traffic signal units at night with waiting periods on average 15 minutes. Duration of Work	July 2009 to June 2011
Contact for Routine Maintenance	Marco du Plessis 083 383 8174

National Route	N1
Section	Orange River (Provincial Boundary) to Bloemfontein (Sydenham Interchange)
Distance	175 km
Description	Predominantly, a two lane single carriageway. The full length of the road has wide paved shoulders.
Condition of Road	Fair to satisfactory.
Comments	Section 13: between Springfontein and Orange River bridge, has recently been rehabilitated and is in a good condition. Minor work such as painting and the placement of roadstuds is in progress. .

Please note that the information contained herein could be subject to change. Routine Maintenance and Emergency Teams may be encountered.

	A new contract for the road reconstruction has been let between Springfontien (Section 13, km36) and Trompsburg (Section 14, km19). Stop/Go control in place, with expected delays of up to twenty minutes.
Duration of Work	Construction / Rehabilitation activity between Orange River and Springfontien is scheduled for completion by the 4 December 2009..For Spingfontein to Trompsburg, scheduled completion is Nov 2011.
Contact for Routine Road Maintenance	Potgieter CJ (Pottie) 0825667301

National Route	N1
Section	Bloemfontein to Kroonstad
Distance	189 km
Description	Around Bloemfontein, the road is a four-lane dual carriageway with wide paved shoulders; otherwise it is a two-lane single carriageway with paved shoulders and passing lanes on steep gradients. The last 10 km, known as the Kroonstad Bypass, is a four-lane dual carriageway.
Condition of Road	Generally good with the exception of the construction area mentioned below.
Comments	Construction of a second carriageway underway between Bloemfontein and the Verkeerdevlei toll plaza. While two lanes are open to traffic, restriction of shoulder width and carriageway cross-overs will be encountered in construction zones. A reduced speed limit is in force along the entire construction area and motorists must be aware of construction traffic entering and exiting work zones Motorists should be alert to pedestrian and heavy vehicle activity in Ventersburg, where an urban speed restriction is in place.
Duration of Work	February 2010
Contact for Routine Road Maintenance	Frank Joubert 083 781 3676

Section	Brookes Nek (provincial boundary) to Port Shepstone
Distance	135 km
Description	This first section of the N2 in KZN is a two-lane single carriageway with narrow paved shoulders. Climbing lanes are provided on all the severe grades with the exception of a short 6 km section 26 km north of Kokstad.
Condition of Road	Good.
Comments	There are no construction works. Motorists to be aware of pedestrian activity between Harding and.
Duration of Work	
Contact for Routine Road Maintenance	Collin Naidoo 0824436509

National Route	N2
Section	Port Shepstone to Durban (N2/N3 Interchange)
Distance	114 km
Description	The first 20 km is a single carriageway road with three lanes of traffic and narrow paved shoulders allowing overtaking opportunities. Thereafter the road becomes a four-lane dual carriageway with wide paved shoulders. The last 17 km leading into Durban has 3 lanes in each direction and is heavily trafficked.
Condition of Road	Good.
Comments	A new project commenced in July 2008 for upgrading of the Higginson Highway and Edwin Swales Interchanges in Durban. There will be minimum disruption to traffic on the N2, with only reduction in speed envisaged, while the on-off ramps will be controlled through stop/go boards. Construction to upgrade the Moss Kolnick Interchange is only likely to commence in March 2010, for a period of approximately 20 months. There will be deviations and reduced speeds. Contra-flow traffic will be enforced during various phases of the upgrading. There will be a reduced clearance limit for construction of the bridge deck over the N2.
Duration of Work	12 months, up to October 2011.
Contact for Routine Road Maintenance	Nico Bossman Denzil Guruvan 082 444 8858 083 778 6197

National Route	N2
Section	Durban to Empangeni
Distance	162 km
Description	For 71 km, up to Stanger, the road is a four-lane dual carriageway. For the next 52 km, up to the Mtunzini Toll Plaza, the road is a four-lane single carriageway with wide paved shoulders. The remaining portion is also a single carriageway with alternating passing opportunities.
Condition of Road	Good.
Comments	A new project commenced in October 2008 for upgrading of the Inanda/Umgenei Interchanges in Durban. There will be minimum disruption to traffic on the N2, with only short term closures of the slow lanes and reduction in speed envisaged, while the on-off ramps will be controlled through stop/go boards and reduced lanes. In June 2008 the construction of a new interchange for the King Shaka Int. Airport, north of the Mhloti river started. There will be a reduced clearance limit for construction of the bridge deck over the N2. Speed reductions will be signposted. A pedestrian bridge construction commenced in July 2009, approximately 3km north of Mount Edgecombe Interchange. There will be minimum disruption to traffic and speed reductions will be signposted for the duration of construction of 10 months. Traffic windows will be in place for construction of the bridge deck over the freeway.
Duration of Work	20 months, up to May/ 2010.

N3

National Route	N3
Section	Durban to Cedara (Hilton)
Distance	85 km
Description	This entire section is a multi-laned dual carriageway. The first four km out of Durban carries heavy traffic with up to 5 lanes in each direction. The next 40 km, up to Cato Ridge, has 3 lanes in each direction with wide paved shoulders. The section between Cato Ridge and the end of the Pietermaritzburg Bypass (33 km) has a two-lane plus paved shoulder configuration, except on steep gradients to the east of Pietermaritzburg where climbing lanes are provided. Major upgrading of the Chota Motala Road Interchange (formerly Greytown Road Interchange) is scheduled for March 2010. It is expected that there will be deviations and reduced speeds. It may be necessary for contra-flow traffic to be enforced during various phases of the upgrading. The final 14 km to Howick incorporates the notorious, steeply graded Town Hill, which has 3 lanes with paved shoulders in each direction.
Condition of Road	Mostly good but extensive patching can be expected between Cato Ridge and Pietermaritzburg. . Misty conditions occur frequently.
Comments	Currently, consultants have been appointed for the design phase of the Cato Ridge to Cedara section and to assist SANRAL with its intention to extend the N3 Toll Route to include the section from Key Ridge to Cedara.

National Route	N3 (N3 Toll Concession Route)
Section	Cedara to Heidelberg
Distance	415 km

Please note that the information contained herein could be subject to change. Routine Maintenance and Emergency Teams may be encountered.

Description	This section of road is a public private partnership between SANRAL and the N3Toll Concession (Pty) Ltd. This toll route is a four-lane dual carriageway road between Cedara and the Tugela Toll Plaza. From the Tugela Toll Plaza to Wilge Toll Plaza, the road is a four-lane single carriageway with paved shoulders of varying width. The section between the Tugela Toll Plaza and Warden is an unlimited access road with at-grade intersections. The remainder of the road between Villiers and Heidelberg is a four-lane dual carriageway with wide-paved shoulders.
Condition of Road	Good.
Comments	Current Construction works include: (i) Rehabilitation works between Mngeni River (Howick) and Nottingham Road. Expected completion is May 2010. (ii) Concrete repair works between Frere Interchange and the Tugela Toll Plaza. Expected completion is December 2009. (iii) Rehabilitation works on Van Reenens Pass. September 2009 to July 2010 (iv) Isolated rehabilitation works between Van Reenen Village and Harrismith. September 2009 – February 2010. (v) Ongoing routine road maintenance. Through the construction zones, traffic may be restricted to one lane in each direction under reduced speed. During certain peak traffic periods, all four lanes will be open to traffic.
Duration of Work	Please see above. Maintenance personnel will be on standby to deal with any emergency repairs.

Description	A two-lane single carriageway with paved shoulders.
Condition of Road	Good
Comments	Resealing work will commence in January 2010, will result in delays and reduced speed.
Contact for Routine Road Maintenance	Flip Jacobs 082 563 5218
National Route	N6
Section	Jamestown – Aliwal North
Distance	Nek (km14) – Kalkoenkraal (km 33)
Description	
Condition of Road	
Comments	
Contractor	Roadmac Surfacing Petri Du Plooy 083 547 6003

National Route	N6
Section	Aliwal North to Bloemfontein
Distance	200 km
Description	Predominantly, a two-lane single carriageway with only the last 2.36km National Route 6 and National Route 1 with wide paved shoulders. The rest of the route has gravel shoulders of varying widths.
Condition of Road	Only a 42km section between Reddersburg and Bloemfontein is in excellent condition. Between Aliwal North and Smithfield the road is in a good condition. Be alert some potholes are developing between Aliwal North and Rouxville. The rest of the route is satisfactory – except for Section 7 between Smithfield and Reddersburg which is in a poor condition with the pavement extensively rutted and bumpy in some places.
Comments	Request road – users to adhere to the permanent and temporary road signs erected, when passing through between Smithfield and Reddersburg. Expect some stop/go areas on this section of route, which will be accompanied by traffic accommodation or closure road-signs – Be patient, as the maintenance teams will be on road for Patching and other Routine Road Maintenance activities.
Duration of Work	Construction is only scheduled to commence in February 2010 for the half portion between Smithfield and Paryshoogte.
Contact for Routine Road Maintenance	Potgieter CJ (Pottie) 0825667301

N7

National Route	N7
Section	Melkbos Turn-off to Clanwilliam
Distance	198 km
Description	A single carriageway road with paved shoulders between Melkbos and Piekenierskloof Pass; thereafter gravel shoulders.
Condition of Road	Fair to Good.
Comments	Construction works are in progress at the Abbotsdale, Riebeeck West, Moorreesburg South, Moorreesburg North and Piketberg North Intersections. Motorists can encounter manually and traffic-light controlled Stop/Go operations at the Moorreesburg North and Piketberg North Intersections with waiting periods on average 15 minutes. Construction works will be suspended during the December/January holiday period from 15 December 2009 until 12 January 2010. Motorists should also be aware that the gravel shoulders between Piekenierskloof Pass and Clanwilliam are very narrow.
Duration of Work	August 2009 to March 2010
Contact for Routine Road Maintenance	Sandla Tsengiwe 083 701 4979

N8

National Route	N8
Section	Groblershoop to Kimberley
Distance	285 km
Description	Single carriageway with paved shoulders. Stopping places are provided at regular intervals.
Condition of Road	Fair.
Comments	Routine road maintenance teams may be encountered. Motorists should also be alert to stray animals along the route.
Duration of Work	Ongoing
Contact for Routine Road Maintenance	Andre Bardenhorst 082 779 7025

National Route	N8
Section	Kimberley to Bloemfontein
Distance	150 km
Description	Predominantly, a two-lane single carriageway. The 29 km section between Kimberly and Perdeberg has paved shoulder, while the final eight km immediately adjacent to Bloemfontein is four – lane dual carriageway with wide paved shoulders. The remainder of the road has gravel shoulders.
Condition of Road	Fair
Comments	Maintenance works are continuous throughout Section 10 between Petrusburg and Bloemfontein, be aware potholes developing in this area but the temporary pothole signs will warn the motorists before time . Traffic through work zones will be accommodated by means of Stop/Go boards, where delays of less than five minutes can be expected.
Duration of Work	
Contact for Routine Road Maintenance	Potgieter CJ (Pottie) 0825667301

National Route	N8
Section	Bloemfontein to Maseru
Distance	135 Km
Description	The first five km from Bloemfontein is four-lane dual carriageway with wide paved shoulders. Between Bloemfontien and Thaba Nchu there are alternating passing and climbing lanes. Between Thaba Nchu and Ladybrand is a two-lane single carriageway road with shoulders of varying widths.
Condition of Road	Good – Except for the section between Tweespruit and Ladybrand which is fair to poor.
Comments	Patching teams are active on the section between Tweespruit and Ladybrand and will be accommodated by means of Stop/Go boards where delays of less than five minutes can be expected. A contract has been let for the construction of the Bloemfontein airport interchange, commencing from August 2009, for a period of 10 months. Traffic will be diverted from the east bound (Maseru) carriageway onto the west bound (Bloemfontein) carriageway for approx. 4km in the vicinity of the airport intersection for an initial period and ther-after all traffic diverted onto the new southern ramps of the new interchange. Reduced speeds will be enforced. A deviation for the airport access road as well as the MAsselspoort Road will be in place during this period.
Duration of Work	Bloem airport interchange – 10 months up to May 2010. Rehabilitation is scheduled to commence in June 2009 for the section between Tweespruit and Ladybrand.

National Route	R30/R34 Toll Road
Section	Bloemfontein to Kroonstad via Brandfort/Welkom
Distance	210 km
Description	A single carriageway between National Route N1 and Virginia. Generally, it accommodates two lanes and a narrow paved shoulder or wide gravel shoulder in each direction. The five km portion bypassing Brandfort has 4 lanes and paved shoulders. The section between Virginia and Welkom is a double carriageway and the section between Welkom and Kroonstad is a four-lane undivided carriageway with paved shoulders.
Condition of Road	Variable, but generally good.
Comments	This road was named the ZR Mahabane Toll Road at an official naming ceremony held on 12 October 2008. Four contracts for the upgrading of this road is currently underway as follows: - Glen Lyon I/C to Brandfort North This 22 month upgrade contract commenced on 22 June 2009 and will be the last of the four upgrade contracts to be completed. This contract will include the construction of a Toll plaza. - Brandfort North to Vet River This contract commenced on 26 June 2008. Construction takes place in half widths but with 2-way traffic during the December/January holiday period. - Vet River to Beatrix mine turn-off This contract commenced on the 7 November 2008. - Beatrix mine to Virginia This contract commenced on 12 February 2009. Route P3/1 will be closed for traffic and all traffic will be diverted onto the provincial route S988. This bypass route is an acceptable proposal that has been endorsed by the Free State Department of Public Works, Roads and Transport
Duration of work	Until May 2011
